Two-stroke vehicles are powerful, but they tend to be noisy and stinky, and often have poor fuel efficiency. The two-stroke 600 cc engine in the *Ski-Doo MX Z TNT H.O. E-Tec Snowmobile* (\$9650) uses technology adapted from outboard motors; the manufacturer claims it fixes typical two-stroke drawbacks. On a test drive through the forests of Ontario, we found it to be odorless on startup, as quiet as a four-stroke and as nimble as a dirt bike. [ski-doo.com](http://ski-doo.com)
